Configuración basica

DHCP

IPV6

```
(config)ipv6 unicast-routing
(config)ipv6 dhcp pool {name}
    prefix-delegation pool {name}
interface f0/0
    ipv6 enable
    ipv6 address {IPV6}/64
    ipv6 nd managed-config-flag
    ipv6 dhcp server {name}
ipv6 local pool {name} {IPV6}/64
{client} ip auto
```

ACL

ACL Standard: (config)#access-list n {permit — deny} source {source-mask}

ACL extendida: (config)#access-list n {permit — deny} protocol source {source-mask} destination {destination-mask} [eq destination-port] Protocol: ip — tcp — udp — icmp Comparación: gt — lt — eq Origen/destino:

- 1 sola dirección IP: host
- 1 subred: ip wildcard
- cualquier subred: any

Hola mundo escribo algo para que veas que si funciona.
